## TECHNICAL INFORMATION

TVS ACOUSTICS

NOISE & VIBRATION CONTROL

**TVS ABSorb Photo** panels are sound absorbing panels with an upholstered image applied to the face. These offer a creative, yet functional way to make your space unique. The photo is printed on to specially selected open weave fabric which allows the sound to pass through the fabric and into the sound absorbing panel.

Used in offices, restaurants, schools, community halls, etc, they make a striking feature for boardrooms or restaurants where sound issues may only be realised at a later date. The panels are easy to install with our TVS Construction Mastic and impaling clips, or as hanging rafts from the ceilings with the suspensions kits provided. The **TVS ABSorb Photo** can be manufactured to sizes to suit your requirements up to a maximum panel size of 2700 x 1200mm.

We provide a library of images from which you are able to choose very high definition images at [www.shutterstock.com](http://www.shutterstock.com). Choose any image from this library, provide us the reference number and we will be able to print this on to the acoustic fabric, or supply your own high resolution images. The photos consist of high resolution images which do not lose clarity when enlarged. A landscape image should be selected for a landscape panel and a portrait image for a portrait panel.

### Standard Sizes: (25mm or 40mm thickness)

1200 x 600mm	1200 x 1800mm
1200 x 900mm	1200 x 2100mm
1200 x 1200mm	1200 x 2700mm

## TECHNICAL INFORMATION

**TVS ACOUSTICS**  
NOISE & VIBRATION CONTROL

### Technical & Acoustic Performance

### Cleaning

Light dirt marks may be removed by using a proprietary carpet spot cleaner. A small area should be tested before doing the rest of the area to ensure that the fabric is not adversely affected.

### Fire Ratings

TVS ABSorb Photo core board has been tested and offers Class O fire rating to BS476: Part 6. Fabric facing meets the requirements of Class B1 for building materials according to DIN 4102, part 1 (May 1998).

### Weight

TVS ABSorb Photo panels:

3.5kg/m<sup>2</sup> – 25mm thickness panels

4.5kg/m<sup>2</sup> – 40mm thickness panels

*Note: All weights are given as approximations.*
