

TVS Metal Wood Effect Baffles

Lancaster University – Library Extension, Phase 3

PROJECT INFORMATION

Project Objective

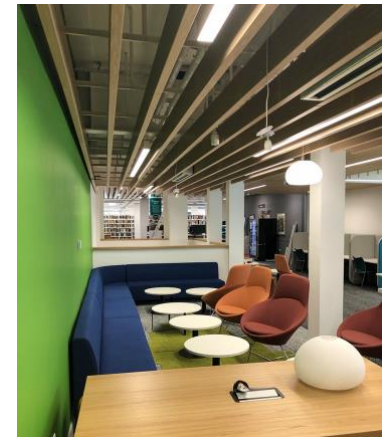

TVS were approached to offer cost saving alternatives for the metal baffles required on the third phase of the library extension at Lancaster University. Following approval of our samples to the client's satisfaction, we supplied a quantity of Metal Baffles & Wall Panels with a wood effect finish to various areas across the scheme. Installed by Hexan Ltd along with a number of our TVS ABSorb rafts in other areas, John Turners and their client are very happy with the finish and the final result.

Product

TVS Metal Baffles - various sizes
TVS Metal Wall Panels - various sizes
